

Signs of Hearing Loss

Do you often ask others to repeat themselves?

Do you turn up the T.V or radio louder than others prefer?

Is it particularly difficult to understand conversation when there is background noise present?

Does it seem that others are mumbling when they speak to you?

Do you have difficulty following group conversations?

Do you find it difficult to identify which directions sounds are coming from?

Do you have a difficult time understanding speech on the telephone?

If you answered yes to three or more of these questions, you may want to see an audiologist for a hearing evaluation.
